## FEATURES

The sponge-pattern of air filter can endure the high temperature of 100o , with toughness, and is uneasy to deform. In order to maintain the efficiency of the air filter, the best method of maintaining performance is to replace regularly (each two years) a new air filter.

**NECK SIZE:**

60mm	70mm
65mm	77mm

- 1 High Flow Filter Element With Filtration Proiction
- 2 Extreme Built-in Velocity Stack
- 3 High Grip Design For Perfect Fitment
- 4 Urethane Base Can Ensure The Temperature In The Engine By Heat Over 140 C
- 5 Light Urethane Top
- 6 Strong Galvanized Steel Mesh
- 7 Bright Epoxy Coating
- 8 Deep Pleats/3d Precision Weaving Technology Increases 20% Filtration Area
- 9 Urethane Base Is One-piece Formed, anti-vibration And Durable

**NECK SIZE:**

9mm	35mm
12mm	42mm
25mm	50mm

**COLD AIR INTAKE SYSTEMS**

1. Available for the pipe inlets-65/70/77/80/85mm
2. Egr valve design
3. Designed by increasing volumetric efficiency
4. Increases power and performance
5. Inverted vector cone increases air flow to engine
6. Easy to install

**SUPER INLET  
 BIG TUBE**

Is specially designed for civic-series , effectively increasing the compressed air flow by its enlarged pipe.  
 Urethaeen top and base are durable.

**PE/CARBON**

equipped with urethane filter and high density PE intake pipe.

**ALUMINUM INTAKE**

The additional installation of aluminum pipe for the components of this series not only can improve the horsepower, but also can make the whole vision more perfect.

**COLOR:** Red  Silver   
 Blue  Carbon
