■ OE STANDARD DESIGN

Our products designed and manufactured according to OE standard. Characterized by high performance, environment-friendly, stability and durability, reliable work in extreme environment conditions.

■ EXCITATION TYPE MOTOR

Excitation motor with high stability, large torque supply, especially for heavy-duty generator, diesel generator and mechanical engineering.

■ PERMANENT MAGNET MOTOR

Permanent magnet motor with compact structure, small contour, perfectly suitable for small cars with light-duty motorcycles.

Solenoid assy controls power supply to lever out and retrieve driver.

Reduction assy reduces armature rotation speed to increase output torque.

D.E. housing assy functions as fixing to generator as a unified whole.

Driver assy engages with flywheel to transmit torque in single direction

C.E housing assy functions as fixing and bracing to the whole body.

brush holder assy for current commutating

Armature assy transforms electric energy to mechanical energy to offer torque by cutting magnetic field.

field case assy for providing magnetic field
